Janvier 1993

Statistics Canada Statistique Canada **Canadä** 

#### Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Goods and Services Producing Industries Section, Prices Division.

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607) or to the Statistics Canada reference centre in:

| St. John's | (772-4073) | Winnipeg  | (983-4020) |
|------------|------------|-----------|------------|
| Halifax    | (426-5331) | Regina    | (780-5405) |
| Montréal   | (283-5725) | Edmonton  | (495-3027) |
| Ottawa     | (951-8116) | Calgary   | (292-6717) |
| Toronto    | (973-6586) | Vancouver | (666-3691) |

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

#### Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrègées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

#### Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des industries de biens et de services, Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9607) ou au centre de consultation de Statistique Canada à:

| St. John's | (772-4073) | Winnipeg  | (983-4020) |
|------------|------------|-----------|------------|
| Halifax    | (426-5331) | Regina    | (780-5405) |
| Montréal   | (283-5725) | Edmonton  | (495-3027) |
| Ottawa     | (951-8116) | Calgary   | (292-6717) |
| Toronto    | (973-6586) | Vancouver | (666-3691) |

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux utilisateurs qui habitent à l'extérieur des zones de communication locale des centres régionaux de consultation.

#### Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

#### Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

## **Symbols**

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- -- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- confidential to meet secrecy requirements of the Statistics Act.

#### NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

#### Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- -- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

#### NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division de la commercialisation, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

Marque déposée de Statistique Canada.

#### Révisions

Sauf avis contraire, les indices de prix contenus dans la présente publication sont susceptibles d'être révisés pour les six derniers mois indiqués. Toute révision portant sur une plus longue période est indiquée.

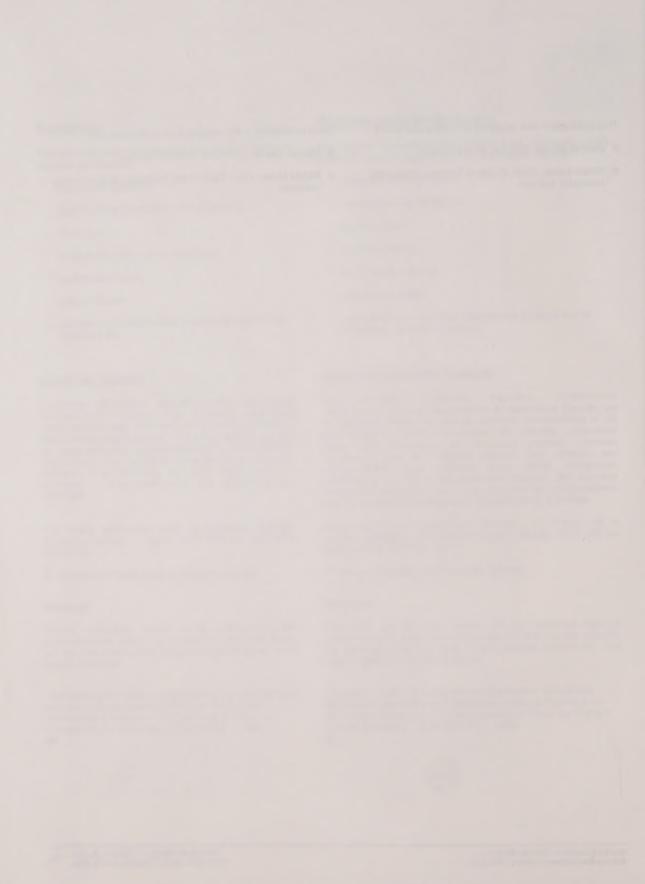

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

This publication was prepared under the direction of:

- Michel Jacod, Director, Prices Division
- Robin Lowe, Chief, Goods & Services Producing Industries Section

Cette publication a été rédigée sous la direction de:

## **Highlights**

#### **Industrial Product Price Index**

According to preliminary figures, the Industrial Product Price Index (IPPI, 1986 = 100) rose 0.4% to 111.4 in January 1993 from December's level of 111.0. Fifteen of the 21 major groups of products registered increases in their indices while five decreased and one did not change. The bulk of the increase in the IPPI was due to the 6.4% increase in the lumber, sawmill and other wood products price index. Primary metal products (0.8%) and automobiles, trucks and other transport equipment (0.3%) were amongst the other contributors to the IPPI increase. Price declines with noticeable offsetting effects occurred in petroleum and coal products (-1.5%) and in paper and paper products (-1.1%).

During January, the value of the US dollar rose 0.4% against the Canadian dollar, raising the value of export prices denominated in American dollars. In January 1993, the American dollar was 10.9% higher against the Canadian dollar than in January 1992.

Compared to January 1992, the IPPI was 3.9% higher. The most important price increases over the last twelve months were in autos, trucks, and other transport equipment (7.9%) and in lumber, sawmill and other wood products (23.6%). There were also increases of over 4% in meat, fish, and dairy products (5.6%) and in tobacco and tobacco products (4.6%). Two declines occurred, both under -1.0%, with the larger being in rubber, leather, and plastic fabricated products at -0.6%. If petroleum and coal products are excluded, the 12-month change for the index was 4.1%.

The first stage intermediate goods price index recorded a -0.4% decline from December, but the second stage intermediate goods index rose 0.8%. The finished foods and feeds, the capital equipment, and the all other finished goods price indices all recorded 0.2% increases over December. All five of these indices were higher than a year earlier, ranging from finished foods and feeds at 2.5% to capital equipment at 4.9%. During the last thirteen months, the year-to-year price changes both for second stage intermediate goods and for finished goods have tended to rise. The year-to-year changes have risen from -3.6% and -0.4% respectively in January 1992 to 4.3% and 3.9% respectively in January 1993.

Lumber, sawmill and other wood products index showed a 6.4% increase in January 1993 and stood 23.6% higher than in January 1992. Contributing to the rapid growth in softwood prices, particularly in the last three months, have been growing housing starts, pent up demand together with lower interest rates, and supply restrictions in the USA. These conditions have been reinforced by the lower Canadian dollar.

The autos, trucks and other transportation equipment price index rose 0.3% in January and stood 7.9% higher than a year ago. These increases were mostly due to the effect of the change in the valuation of the Canadian dollar on the price of exports although there were also smaller price increases on domestic vehicles on a year-to-year basis.

The primary metal products index increased by 0.8% in January and stands 2.0% higher than a year ago. Price increases for aluminum products have contributed significantly to both the monthly and the year-to-year increase. Nickel products were the other main contributor to the monthly increase while copper products were the other main contributor to the year-to-year increase. Declines in iron and steel prices have tended to reduce both the monthly and the year-to-year change and nickel prices are 15.8% below what they were in January 1992.

The paper and paper products decline was due to a -5.7% decline in the pulp price index for pulp. Nevertheless, the pulp price index is still 7.8% higher than in January 1992.

## Faits saillants

#### Indice des prix des produits industriels

D'après les chiffres provisoires, l'indice des prix des produits industriels (IPPI, 1986 = 100) a progressé de 0.4% pour s'établir à 111.4 en janvier 1993, alors qu'il se fixait à 111.0 en décembre. Sur vingt et un indices de grands groupes de produits, quinze ont augmenté, cinq ont diminué et un est resté inchangé. La majeure partie de la progression de l'IPPI était attribuable à la hausse de 6.4% observée pour les sciages, produits de scierre et divers. Les produits métalliques primaires (0.8%) et les voitures, les camions et le matériel de transport (0.3%) ont aussi contribué à faire progresser l'IPPI. Les baisses de prix de nature clairement compensatoire ont été observées pour les produits du pétrole et du charbon (-1.5%); et du papier et des produits connexes (-1.1%).

En janvier 1993, le dollar américain s'est apprécié de 0.4% par rapport au dollar canadien, d'où l'accroissement des prix à l'exportation exprimée en dollars américains. En janvier 1993, le dollar américain était 10.9% plus élevé que le dollar canadien, comparativement à janvier 1992.

Par rapport à janvier 1992, l'IPPI a progressé de 3.9%. Les principales hausses survenues pendant les douze mois étaient celles des voitures, des camions et du matériel de transport (7.9%); et des sciages, produits de scierie et divers (23.6%). On a aussi observé des hausses supérieures à 4% pour la viande, le poisson et les produits laitiers (5.6%); et le tabac et les produits du tabac (4.6%). Les deux baisses étaient inférieures à 1.0% et la principale concernait les produits du pétrole et du charbon, la variation sur douze mois de l'indice a été de 4.1%.

L'indice des produits semi-finis de première étape a régressé de 0.4% par rapport à décembre, mais celui des produits semi-finis de deuxième étape a monté de 0.8%. Les indices des prix des aliments de consommation et aliments pour animaux, du matériel capitalisé et des autres produits finis ont tous enregistré des hausses de 0.2% par rapport à décembre. Les cinq catégories de produits industriels affichaient des prix plus élevés qu'un an plus tôt. Le matériel capitalisé venait en tête, avec une hausse de 4.9%, et les aliments de consommation et aliments pour animaux fermaient la marche, avec une augmentation de 2.5%. Pendant les treize derniers mois, les variations annuelles des prix ont connu une tendance à la hausse pour les produits semi-finis de deuxième étape et les produits finis. Les taux respectifs sont passés de -3.6% et -0.4% en janvier 1992 à 4.3% et 3.9% en janvier 1992

L'indice des sciages, produits de scierre et divers a grimpé de 6.4% en janvier et dépassait de 23.6% son niveau d'il y a un an. La montée rapide des prix du bois de résineux, en particulier durant les trois derniers mois, était due à l'accroissement des mises en chantier et de la demande de logements, à la baisse des taux d'intérêt, et des restrictions concernant l'offre aux États-Unis. Ces facteurs étaient en outre soutenus par la baisse du dollar canadien.

L'indice des voitures, des camions et du matériel de transport a progressé de 0.3% en janvier et dépassait de 7.9% son niveau d'un an plus tôt. L'augmentation s'expliquait principalement par la baisse du dollar canadien et aussi par de modestes renchérissements des voitures domestiques pendant l'année.

L'indice des produits métalliques primaires a augmenté de 0.8% en janvier et dépassait de 2.0% son niveau d'il y a un an. Les prix des produits de l'aluminium ont beaucoup contribué à la progression observée pour le mois et d'une année à l'autre. Les prix des produits du nickel étaient l'autre facteur principal de la hausse mensuelle, tandis que les prix des produits du cuivre étaient l'autre facteur principal de l'augmentation annuelle. Les baisses des produits du fer et de l'acier ont eu tendance à réduire le rythme des variations mensuelles et annuelles, et les prix des produits du nickel étaient 15.8% plus bas qu'en janvier 1992.

La baisse des prix du papier et des produits connexes était due au recul de 5.7% des prix des pâtes. Néanmoins, l'indice des pâtes dépasse encore de 7.8% son niveau de janvier 1992.

## **Highlights**

#### **Raw Materials Price Index**

Preliminary data show the Raw Materials Price Index (RMPI, 1986 = 100) at 108.3 for January 1993, down 1.7% from the December level of 110.2. Most components comprising the RMPI registered increases. Higher prices were recorded in the indexes for wood (1.9%), vegetable products (1.4%) and ferrous materials (2.2%). These gains were more than offset by the 7.2% decline in prices for mineral fuels. The animal and animal products index contributed as well to the overall decrease with a 0.5% drop in its prices. The RMPI excluding mineral fuels was up 0.6% from the previous month.

The RMPI increased 10.4% over the January 1992 level, mainly because of higher prices for wood (22.2%), mineral fuels (8.0%), animal and animal products (7.7%) and non-ferrous metals (9.7%). The RMPI excluding mineral fuels rose 11.4% over the past year.

The mineral fuels index was down in January 1993 by 7.2% as a result of lower prices for crude mineral oil (-7.8%). The coal index (1.7%) registered its sixth increase in as many months. The mineral fuels index was higher by 8.0% from January 1992, due primarily to a 8.4% increase in the index of crude mineral oil, although prices for crude mineral oil have declined by 13.1% since November 1992.

The animal and animal products index posted a -0.5% decrease over the past month. The major contributors to this decline were hogs for slaughter (-4.5%) and fish (-4.9%). These declines were partially offset by the cattle for slaughter index which recorded its fifth consecutive monthly increase (2.7%). Over the past year, the animal and animal products index increased 7.7% as a result of higher prices for cattle for slaughter (22.9%) and for hogs for slaughter (20.1%).

The wood index was up 1.9% in January, primarily due to a 2.4% increase in logs and bolts prices. This is the twelfth increase in a row. On a year to year basis, the wood index increased 22.2% owing mainly to higher prices for logs and bolts (31.0%).

The vegetable products index posted an increase of 1.4% in January 1993, reflecting higher prices for tobacco (12.1%) and wheat (3.0%). The vegetable products index was up 8.9% from its January 1992 level as a result of higher prices for rapeseed (29.6%), potatoes (22.4%), natural rubber and allied qums (28.2%) and wheat (6.6%).

The ferrous materials index was up 2.2% in January mainly due to an increase of 4.6% in the iron and steel scrap index. Compared to January 1992, the ferrous materials index rose 6.7%, owing to higher prices for iron ore (8.4%) as well as for iron and steel scrap (4.8%).

## Faits saillants

### Indice des prix des matières brutes

Les chiffres préliminaires du mois de janvier 1993 indiquent que l'indice des prix des matières brutes (IPMB, 1986 = 100) a diminué de 1.7% par rapport au niveau de décembre (110.2), pour s'établir à 108.3. La plupart des composantes faisant partie de l'IPMB ont enregistré des hausses. Des prix plus élevés ont été rapportés par les indices du bois (1.9%), des substances végétales (1.4%) et des matières ferreuses (2.2%). Ces hausses ont été plus que contrebalancées par la baisse de 7.2% dans les prix des combustibles minéraux. L'indice des animaux et des substances animales a aussi contribué à la baisse de l'indice global avec une diminution de 0.5%. L'IPMB sans la composante des combustibles minéraux a affiché une hausse de 0.6% au cours du dernier mois.

Par rapport au mois de janvier 1992, l'IPMB a progressé de 10.4%, principalement en raison des augmentations de prix rencontrées chez le bois (22.2%), les combustibles minéraux (8.0%), les animaux et substances animales (7.7%) et les métaux non ferreux (9.7%). L'IPMB sans la composante des combustibles minéraux a augmenté de 11.4% entre janvier 1992 et janvier 1993.

L'indice des combustibles minéraux a diminué en janvier 1993 (-7.2%) suite à la baisse de 7.8% des prix des huiles minérales brutes. Cependant, l'indice du charbon a affiché sa sixième augmentation en autant de mois, soit de 1.7%. L'indice des combustibles minéraux a augmenté de 8.0% comparativement à l'an dernier, en raison de la hausse des prix des huiles minérales brutes (8.4%), malgré la diminution de 13.1% depuis novembre 1992 dans les prix des huiles minérales.

L'indice des animaux et substances animales a enregistré une baisse de 0.5% ce mois-ci. Les principaux indices qui en sont responsables sont ceux des porcs destinés à l'abattage (-4.5%) et des poissons (-4.9%). Ces diminutions ont été partiellement contrebalancées par l'indice des prix des bovins envoyés à l'abattage qui a affiché sa cinquième augmentation en autant de mois (2.7%). Au cours de la dernière année, l'indice des animaux et substances animales a augmenté de 7.7%, en raison des hausses dans les indices des prix des bovins envoyés à l'abattage (22.9%) et des porcs destinés à l'abattage (20.1%).

L'indice du bois a, pour sa part, progressé de 1.9% en janvier, en raison de l'augmentation de 2.4% enregistrée dans les prix des billes et billots. Cette augmentation est la douzième en autant de mois. Par rapport à janvier 1992, l'indice du bois a augmenté de 22.2% en raison de prix plus élevés pour les billes et billots (31.0%).

L'indice des substances végétales a enregistré une hausse de 1.4% en janvier suite à des augmentations dans les prix du tabac (12.1%) et du blé (3.0%). Au cours des douze derniers mois, les prix des substances végétales ont augmenté de 8.9%, principalement à cause des hausses dans les prix du colza (29.6%), des pommes de terre fraîches (22.4%), du caoutchouc et gommes analogues, naturels (28.2%) et du blé (6.6%).

Quant à l'indice des matières ferreuses, il s'est inscrit à la hausse en janvier (2.2%), à cause de l'augmentation de 4.6% dans les prix des déchets de fer et d'acier. Par rapport à l'an dernier, l'indice des matières ferreuses a augmenté de 6.7%, en raison des prix plus élevés dans l'indice du minerai de fer (8.4%) ainsi que dans l'indice des déchets de fer et d'acier (4.8%).

Indexes for the most recent six months shown are subject to revision. Les indices figurant pour les six mois les plus récents sont sujets à révision. Nota:

This shows the amount by which the movement of each index would move the total in the absence of any change in the other indexes.

Ce chiffre donne l'ampleur de la variation qu'occasionnerait dans l'indice d'ensemble un mouvement d'un indice donné si tous les autres indices demeuraient (1)

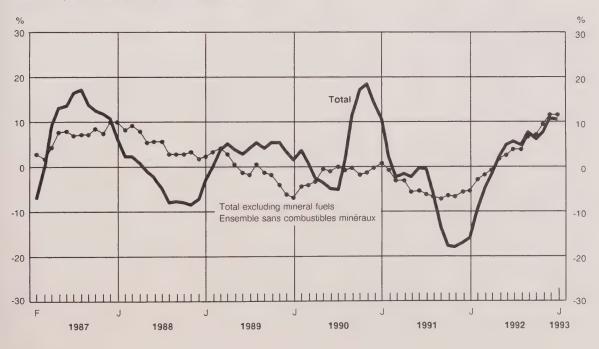

These indexes are preliminary.
Ces indices sont provisoires.

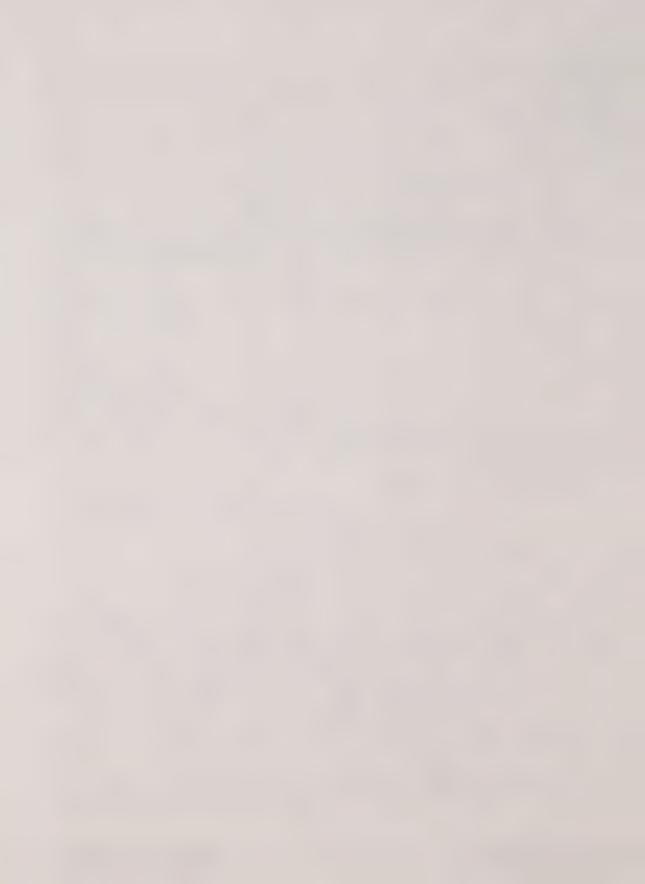

## Raw Materials Price Index Indice des prix des matières brutes

## Percentage Change in the Raw Materials Price Index Variation en pourcentage de l'indice des prix des matières brutes

From same month of previous year Variation depuis le même mois que l'année précédente

The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All
Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux différent occasionnellement en raison de l'arrondissement, l'indice total – tous les produits devra être considéré comme celui qui fait autorité, et l'indice total – toutes les industries manufacturières sera posé égal. (3)

TABLEAU 2. Indices des prix des produits industriels, par produits et agrégations de produits

1986 = 100

Indexes for the most recent six months shown are subject to revision.
Les indices figurant pour les six mois les plus recents sont sujets à révision.
The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where ss indicates the S-level commodity code (from 14 to 43, 45 to 69) nm indicates the M-level commodity code (from 14 to 43, 45 to 69) nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details pppp indicates the PCG code (except for some special aggregations which include several PCGs). Tri indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E - S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price indexes 1981 = 100, Concepts and Methods (Catalogue 62-555).

The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où: ss indique le code du niveau S des produits (de 14 à 43, 45 à 69) mn indique le code du niveau M des produits (de 14 à 43, 45 à 69) nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers. pppp indique le code GPP (sauf pour certains agrégats speciaux qui comprennent plusieurs GPP) rr indique une composante d'un GPP.

La mesure qui depré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un

rr indique une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: É indique un échantillonage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonage direct (E+S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus prés afin d'assurer la confidentailité, a mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés. A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n<sup>0</sup> 62-556 au catalogue).

Note:

(1)

Indexes for the most recent six months shown are subject to revision.
Les indices figurant pour les six mois les plus récents sont sujets à révision.
The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
L'agregation des indices par produits ou par industries devraient resulter en un même grand total. Lorsque ces totaux différent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qu'alit autorité, et l'indice total - toutes les industries manufacturières sera posé égal.
The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.
Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité. (2)

Monthly prices are collected and processed three times per annum.

Des prix mensuels sont relevés et calculés trois fois par année.

Indexes for the current year and previous year are subject to revision.

Les indices pour l'année courante et pour l'année précedente sont sujets à révision.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

# EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

#### Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

#### **Price Surveys**

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

# EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

#### Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

#### Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

#### Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Withincommodity weights can change in December of each year to reflect major changes in production patterns.

#### Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w<sup>i</sup> are the values of the output of each commodity:

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

#### Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

#### Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w' sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_{i} \frac{w^{i}}{\sum_{w^{i}}} \cdot P_{t/o}^{i}$$

| P <sub>t/o</sub> | denotes the composite price index movement between the base period o and time t for the defined aggregate; | P <sub>t/o</sub> | dénote le mouvement de l'indice composite de prix<br>entre la période de référence o et la période t pour<br>l'agrégat défini; |
|------------------|--|------------------|--|
| wi               | is the transaction value of the element i in the base period;  | Wİ               | est la valeur de transaction de l'élément i au cours<br>de la période de référence;  |
| P <sub>t/o</sub> | is the price index for element i, meaning its price change from the base period to time t;                 | P <sub>t/o</sub> | est l'indice de prix de l'élément i, désignant sa<br>variation de prix entre la période de référence et la<br>période t;       |
| $\sum_{i}$       | indicates summation over all elements i in   | $\sum_{i}$       | signifie la sommation de tous les éléments i dans  |

l'agrégat défini.

the defined aggregate.

#### Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

#### **Reference Documents**

62-558 Industry Price Indexes, 1986 = 100: users' guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

#### Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

#### Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: guide aux utilisateurs, 40,00 \$.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 \$.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

#### RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

#### INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

composite

price

index

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entréessorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

dénote le mouvement de l'indice composite de prix

$$P_{t/0}^{(agg)} = \sum_{i} \frac{w^{i}}{\sum_{w^{i}}} \cdot P_{t/0}^{i}$$

|                  | movement between the base period o and time t for the defined aggregate;                     |                  | entre la période de référence o et la période courante<br>t pour l'agrégat spécifié;   |
|------------------|--|------------------|--|
| W <sup>1</sup>   | is the transaction value of the element i in 1986;   | wi               | est la valeur de transaction de l'élément i en 1986;   |
| P <sub>t/o</sub> | is the price index for element i, meaning its price change from the base period o to time t; | P <sub>t/o</sub> | est l'indice de prix de l'élément i, c'est-à-dire son<br>changement de prix de la période de référence o à la<br>période courante t; |
| $\sum_{i}$       | indicates summation over all elements i in the defined aggregate.                            | $\Sigma_{i}$     | indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.   |

(agg)

P<sub>t/o</sub>

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

# e price quotations are equally weighted. disponibles, les cotes de prix ont des pondérations équivalentes.

# ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

#### INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue. conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril. d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

# HIRE OUR TEAM OF RESEARCHERS FOR \$53 A YEAR

NOTRE ÉQUIPE DE CHERCHEURS EST À VOTRE SERVICE POUR 53\$PAR ANNÉE

Subscribing to Perspectives on Labour and Income is like having a complete research department at your disposal. Solid facts. Unbiased analysis. Reliable statistics.

But Perspectives is more than just facts and figures. It offers authoritative insights into complex labour and income issues, analysing the statistics to bring you simple, clear summaries of where the labour market and income distributions are headed.

Our team of experts is working to bring you the latest labour and income data. Each quarterly issue has:

- topical articles on current labour and income trends
- more than 50 key labour and income indicators
- a review of ongoing research projects
- · information on new survey results

As a special bonus, twice a year you will also receive a Labour Market Review, giving you up-to-the-minute analysis and data of how the labour market has performed over the last six months or year.

#### And all for only \$53.00.

Thousands of Canadian professionals turn to **Perspectives** to discover new trends in labour and income and to stay up-to-date on the latest research findings. As a subscriber, you will get the inside story.

We know you'll find **Perspectives** indispensable. GUARANTEED. If you aren't convinced after reading your first issue, we'll give you a FULL REFUND on all outstanding issues. Order your subscription to **Perspectives** today.

#### ORDER NOW!

For only \$53 (plus \$3.71 GST) you will receive the latest labour and income research (4 issues per year). Subscription rates are US\$64 for U.S. customers and US\$74 for customers outside North America.

S'abonner à **L'emploi et le revenue en perspective**, c'est disposer d'une division entière de chercheurs à votre service. Des faits solides. Des analyses objectives. Des statistiques fiables.

La publication n'a pas que des faits et des chiffres. Elle offre également des analyses de fond sur des questions complexes touchant l'emploi et le revenu, de façon à fournir des indications claires et précises sur les tendances actuelles du marché du travail et de la répartition des revenus.

Notre équipe de spécialistes travaille activement afin de mettre à votre disposition des données actuelles sur l'emploi et le revenu. Dans chacun des numéros trimestriels, vous trouverez

- des articles de fond rédigés par des spécialistes de l'emploi et du revenu;
- plus de 50 indicateurs clés de l'emploi et du revenu;
- un apercu des projets de recherche en cours;
- · de l'information provenant des nouvelles enquêtes.

En plus, vous recevrez une revue du marché du travail, un supplément publié deux fois par année.

#### Tout cela pour 53 \$ seulement!

Des milliers de professionnels au Canada consultent **Perspective** pour connaître les tendances de l'emploi et du revenu, ainsi que les plus récents résultats de recherche. Votre abonnement vous permettra de connaître tous les faits.

Nous savons que **L'emploi et le revenu en perspective** deviendra pour vous un outil indispensable. Nous le garantissons. Si vous n'êtes pas satisfaits après avoir lu le premier numéro, nous vous REMBOURSERONS le montant payé pour les numéros à venir. Abonnez-vous à **Perspective** dès aujourd'hui.

#### ABONNEZ-VOUS DÈS MAINTENANT:

Pour 53 \$ seulement (plus 3,71 \$ de TPS), vous recevrez les plus récentes recherches sur l'emploi et le revenu (quatre numéros par année). L'abonnement est de 64 \$ US aux États-Unis et de 74 \$ US à l'extérieur de l'Amérique du Nord. Faites parvenir votre commande par télécopieur (Visa ou MasterCard) :

Statistics Canada Canadä

# To those of you who need in-depth information about the labour market...

... Statistics Canada produces *Labour Force Annual Averages 1992* – a reference publication created specifically to meet those needs. With detailed data ... Quick-reference summaries and graphs ... Geographical breakdowns in unprecedented detail ... More variables and cross classifications than published in the monthly issues of *The Labour Force*.

#### The Labour Force Annual Averages 1992 covers:

- an overview of employment in the major groups of the goods-producing industries over the period 1976 to 1992;
- time loss and absenteeism by industry and province;
- full-time and part-time employment by industry and province;
- occupations for Census Metropolitan Areas (CMAs) and economic regions;
- · industries for CMAs and economic regions;
- labour market participation and family responsibilities by province;
- · and more.

**Labour Force Annual Averages 1992.** Part and parcel of Statistics Canada's customer-driven approach to business information.

Labour Force Annual Averages 1992 (catalogue number 71-220) is available for \$39 in Canada, US\$47 in the United States and US\$55 in other countries.

To order, write Marketing Division, Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. Or contact the Statistics Canada Regional Reference Centre nearest you. (A list appears in this publication.)

For faster ordering, fax your order to (613) 951-1584. Or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

## À ceux d'entre vous qui désirent obtenir de l'information plus détaillée sur le marché du travail...

... Statistique Canada présente Moyennes annuelles de la population active 1992 – un document de référence créé spécialement à votre intention. Vous y trouverez des données détaillées, des sommaires et des graphiques faciles à consulter, des ventilations géographiques plus détaillées qu'auparavant et davantage de variables et de recoupements qu'il n'en paraît dans les numéros mensuels de La population active.

Moyennes annuelles de la population active 1992 porte sur:

- un aperçu de l'emploi dans les groupes majeures des branches productrices de biens au cours de la période 1976 à 1992;
- les heures perdues et l'absentéisme, ventilés par secteur d'activité et province;
- l'emploi à plein temps et à temps partiel, ventilé par secteur d'activité et province;
- les professions dans les régions métropolitaines et les régions économiques;
- les secteurs d'activité dans les régions métropolitaines et les régions économiques;
- la participation au marché du travail et les obligations familiales selon la province;
- et bien d'autres.

Moyennes annuelles de la population active 1992 est un pivot de l'approche de Statistique Canada qui vise à satisfaire les besoins de ses clients en matière d'information.

Moyennes annuelles de la population active 1992 (numéro 71-220 au catalogue) : est offert à 39 \$ au Canada, 47 \$ US aux États-Unis et 55 \$ US dans les autres pays.

Pour commander, prière d'écrire à l'adresse suivante : Division de la commercialisation, Vente des publications, Statistique Canada, Ottawa (Ontario) K1A 0T6, ou communiquer avec le centre régional de consultation de Statistique Canada le plus proche (liste des centres incluse dans la présente publication.)

Pour accélérer le service, commander par télécopieur au (613) 951-1584, ou composer sans frais le 1-800-267-6677 et utiliser la carte VISA ou MasterCard.

### Do you really have time to monitor over 200 Trusteed Pension Funds?

Y ou do – if you subscribe to Quarterly Estimates of Trusteed Pension Funds.

The only periodical of its kind in Canada, Quarterly Estimates surveys the 200 largest trusteed pension funds, which hold 85% of the assets of all trusteed funds. The result is detailed, aggregate estimates of the income, expenditure and assets of approximately 3,800 funds operating in Canada.

Each issue gives you:

- current financial data for employee and employer contributions to the fund;
- investment income, profits and losses on sales of securities;
- pension payments and annuity purchases.

Distribution of investment portfolios among such vehicles as stocks, bonds, pooled funds and short term holdings is also highlighted. The accompanying analysis examines trends, growth and performance over time.

Get the numbers.

Subscribe to **Quarterly Estimates of Trusteed Pension Funds**, (Catalogue No. 74-001) for the regular update you need. A subscription to this quarterly is \$44 annually in Canada, US\$53 in the United States and US\$62 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

## Vous avez le temps de vous renseigner sur plus de 200 caisses de retraite en fiducie?

O ui – si vous vous abonnez à Estimations trimestrielles relatives aux caisses de retraite en fiducie.

Ce périodique, unique en son genre au Canada, passe en revue la situation des 200 plus importantes caisses de retraite en fiducie, qui représentent 85 % de l'actif de l'ensemble des caisses de retraite. Le résultat prend la forme d'estimations détaillées et globales des recettes, des dépenses et de l'actif d'environ 3 800 caisses de retraite au Canada.

Chaque numéro vous présente :

- des données financières courantes relativement aux cotisations de l'employé et de l'employeur à la caisse de retraite;
- les revenus de placements ainsi que les profits et pertes sur les ventes de titres;
- les paiements des pensions et les achats de rentes.

Vous y trouverez également des renseignements sur la répartition des portefeuilles de placement entre les actions, les obligations, les fonds communs et les placements à court terme ainsi qu'une analyse des tendances, de la croissance et du rendement dans le temps.

Abonnez-vous!

La publication Estimations trimestrielles relatives aux caisses de retraite en fiducie (n° 74-001 au catalogue) vous permet d'obtenir régulièrement les données à jour dont vous avez besoin. L'abonnement à cette publication trimestrielle coûte 44 \$ par année au Canada, 53 \$ US aux États-Unis et 62 \$ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

#### Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

#### Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressées à:

Section des industries de biens et de services, Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9607) ou au centre de consultation de Statistique Canada à:

| St. John's | (772-4073) | Winnipeg  | (983-4020) |

#### **Note of Appreciation**

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

#### Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

#### **Symbols**

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- -- amount too small to be expressed.
- p preliminary figures.
- ' revised figures.
- x confidential to meet secrecy requirements of the Statistics Act

#### NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

Registered Trade Mark of Statistics Canada.

#### Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

#### Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- -- nombres infimes.
- p nombres provisoires.
- ' nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

#### NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division de la commercialisation, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

Marque déposée de Statistique Canada.

#### Révisions

Sauf avis contraire, les indices de prix contenus dans la présente publication sont susceptibles d'être révisés pour les six derniers mois indiqués. Toute révision portant sur une plus longue période est indiquée.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

This publication was prepared under the direction of:

- Michel Jacod, Director, Prices Division
- Robin Lowe, Chief, Goods & Services Producing Industries Section

Cette publication a été rédigée sous la direction de:

#### **Highlights**

#### **Industrial Product Price Index**

According to preliminary figures, the Industrial Product Price Index (IPPI, 1986 = 100) remained unchanged in February 1993 at January's revised level of 111.7. Ten of the 21 major groups of products registered increases in their indices while eight decreased and three did not change. There was a significant increase of 5.8% in the lumber, sawmill and other wood products price index, which was offset by declines in the automobiles, trucks and other transport equipment price index (-1.3%) and the paper and paper products price index (-1.4%).

During February, the value of the US dollar fell -2.2% against the Canadian dollar, reducing the value of export prices denominated in US dollars. This particularly affected the indices for automobiles, trucks, and other transport equipment and for paper and paper products. In February 1993, the American dollar was 5.7% higher against the Canadian dollar than in February 1992.

Compared to February 1992, the IPPI was 3.3% higher. This was a decline from the January year-to-year change of 4.2%. The most important price increases over the last twelve months were in lumber, sawmill and other wood products (26.2%) and autos, trucks, and other transport equipment (4.9%). There were also increases of over 4% in petroleum and coal products (7.0%), tobacco and tobacco products (5.5%), and meat, fish, and dairy products (4.4%). Three declines occurred, all less than 1.0%. Rubber, leather, and plastic fabricated products and primary metal products both declined 0.7% and knitted products and clothing fell 0.3%. Excluding petroleum and coal products, the 12-month change for the index was 3.1%.

The first stage intermediate goods price index recorded a 0.8% decline from January, but the second stage intermediate goods index rose 0.6%. The finished foods and feeds index did record a 0.2% increase over January, but the capital equipment and the all other finished goods price indices both recorded 0.7% declines from January's levels. All five of these indices were higher than a year earlier, ranging from first stage intermediate goods at 0.4% to second stage intermediate goods at 4.5%.

The lumber, sawmill and other wood products price index increased for the fourth consecutive month in February, rising by 5.8%, and was 26.2% higher than in February 1992. Softwood lumber prices continued their rapid growth in most of Canada, but slowed down in BC, particularly on the coast, where prices had begun rising strongly earlier. The price increases were supported by the increases in housing starts on both sides of the border, but particularly in the USA. Supply limitations due to environmental issues and the closing of plants as a result of the recession also contributed to the rise in wood prices.

The autos, trucks and other transportation equipment price index fell 1.3% in February as the value of the US dollar fell, despite a 0.1% increase in the domestic automobile price index and a 0.4% increase in the domestic truck price index. Overall, the autos, trucks, and other transportation equipment index was 4.9% higher than a year ago. Contributing to this was the effect of the change in the valuation of the Canadian dollar on the price of exports as well as a 2.7% increase in the prices of domestic automobiles and a 7.0% increase in the price of domestic automobiles and a 7.0% increase in the price of domestic trucks.

The paper and paper products index fell by 1.4% in February and stood 0.6% lower than a year ago. Central to the February decline was the 6.2% fall in the sulphate woodpulp export price index. This was the fourth consecutive monthly decline in this index. Other February price declines were widespread, though less important. These included domestic sulphate woodpulp (-6.3%), sulphit woodpulp (-3.9%), and newsprint and other paper stock (-0.4%). The year-to-year decline (-0.6%) was also due primarily to a decline in the sulphate woodpulp export price index (-3.8%), but it was also supported by a decline in the newsprint and other paper stock index (-0.1%).

#### Faits saillants

#### Indice des prix des produits industriels

D'après les chiffres préliminaires de février 1993, l'indice des prix des produits industriels (IPPI, 1986 = 100) est resté inchangé par rapport à janvier, à 111.7 (chiffre révisé). Dix des 21 principaux groupes de produits ont enregistré une progression de leur indice, huit ont diminué, tandis que trois sont restés inchangés. L'indice des sciages, produits de scierie et divers a augmenté de façon appréciable (5.8%), ce qui a été compensé par les diminutions de 1.3% de l'indice des voitures, camions et matériel de transport et de 1.4% de l'indice du papier et produits connexes.

En février 1993, le dollar américain s'est déprécié de 2.2% par rapport au dollar canadien, ce qui a réduit la valeur des prix des exportations libellés en dollar américain. Cette dépréciation a touché en particulier les indices des voltures, camions et matériel de transport et du papier et produits connexes. En février 1993, l'appréciation de la devise américaine par rapport à la devise canadienne comparativement à février 1992 s'est établie à 5.7%.

En février 1993, l'IPPI dépassait de 3.3% son niveau de février 1992. Cette variation est inférieure à celle de 4.2% enregistrée entre janvier 1992 et janvier 1993. Les hausses de prix les plus fortes au cours des douze derniers mois ont été observées pour les sciages, produits de scierie et divers (26.2%) et les voltures, camions et autre matériel de transport (4.9%). On a aussi constaté des hausses supérieures à 4% dans le cas des produits du pétrole et du charbon (7.0%), du tabac et des produits du tabac (5.5%) et de la viande, du poisson et des produits laitiers (4.4%). Les trois diminutions relevées ont été toutes inférieures à 1.0%. Les indices des produits en caoutchouc, cuir et matière plastique ainsi que des produits métalliques primaires se sont repliés tous les deux de 0.7%, et celui des produits en tricot et vêtements, de 0.3%. Si l'on exclut les produits du pétrole et du charbon, la variation sur douze mois de l'indice a été de 3.1%.

L'indice des produits semi-finis de première étape a baissé de 0.8% par rapport à janvier, mais celui des produits semi-finis de deuxième étape s'est accru de 0.6%. L'indice des aliments de consommation et des aliments pour animaux a augmenté de 0.2% par rapport à janvier, mais ceux du matériel capitalisé et de tous les autres produits finis ont baissé tous les deux de 0.7% par rapport au mois précédent. Ces cinq indices sont tous supérieurs à leur niveau d'un an plus tôt, les augmentations étant comprises entre 0.4% pour les biens semi-finis de première étape et 4.5% pour les biens semi-finis de deuxième étape.

L'indice des sciages, produits de scierie et divers a augmenté en février pour la quatrième fois de suite (5.8%) et a dépassé ainsi de 26.2% son niveau de février 1992. Les prix du bois de construction de résineux ont continué d'augmenter rapidement presque partout au Canada, mais ils ont ralenti en Colombie-Britannique, en particulier sur la côte, où les prix avaient commencé à augmenter fortement plus tôt. La hausse des prix est attribuable à la croissance des mises en chantier de logements des deux côtés de la frontière, mais surtout aux États-Unis. Les contraintes d'approvisionnement résultant des préoccupations environnementales et de la fernmeture des usines à cause de la récession expliquent aussi la hausse des prix.

L'indice des voitures, camions et autre matériel de transport s'est replié de 1.3% en février, compte tenu de la dépréciation du dollar américain et en dépit d'une augmentation de 0.1% de l'indice des prix domestiques des automobiles et d'un accroissement de 0.4% de l'indice des prix domestiques des camions. Dans l'ensemble, l'indice des voitures, camions et autre matériel de transport a dépassé de 4.9% son niveau d'un an plus tôt. Cette augmentation s'explique notamment par le changement de l'évaluation du dollar canadien sur le prix des exportations de même que par une majoration de 2.7% des prix domestiques des automobiles et par une hausse de 7.0% des prix domestiques des automobiles et par une hausse de 7.0% des prix domestiques des camions.

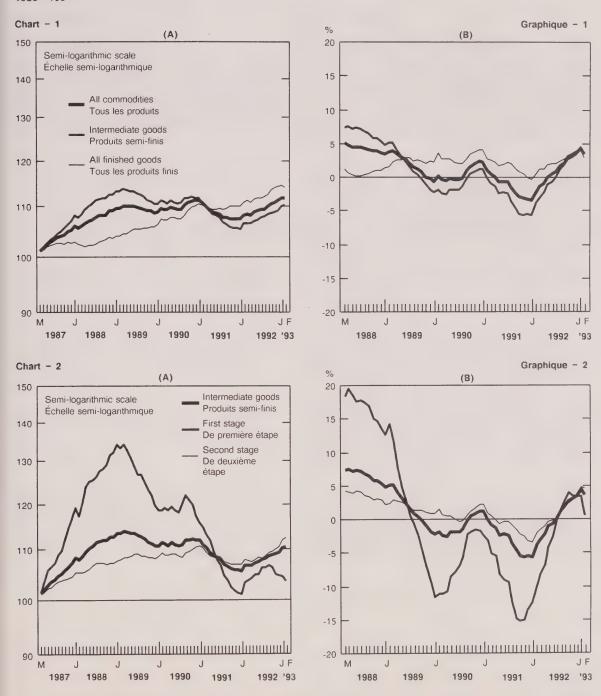

L'indice du papier et produits connexes s'est replié de 1.4% en février et était inférieur de 0.6% à son niveau d'un an plus tôt. La baisse en février s'explique d'abord par une chute de 6.2% de l'indice à l'exportation de la pâte de bois au sulfate. Cet indice a diminué pour le quatrième mois consécutif. Les autres baisses de prix en février sont généralisées, mais moins importantes. Elles comprennent notamment celles des prix domestiques de la pâte de bois au sulfate (-6.3%), de la pâte de bois blanchie au sulfite (-3.9%) ainsi que du papier journal et autres pâtes travaillées (-0.4%). La diminution que l'on a observé depuis le début de l'année (-0.6%) est attribuable principalement à une diminution de l'indice à l'exportation de la pâte de bois au sulfate (-3.8%), à laquelle s'ajoute une autre de -0.1% pour l'indice du papier journal et autres pâtes travaillées.

#### **Highlights**

#### Raw Materials Price Index

Preliminary data show the Raw Materials Price Index (RMPI,1986 = 100) at 110.6 for February 1993, up 2.1% from the January level of 108.3. Five of the seven components comprising the RMPI registered increases. The main contributors to this increase were indexes for mineral fuels (4.6%), wood (4.6%) and animal and animal products (0.7%). These gains were partially offset by decreases in indexes for non-ferrous metals (-1.5%) and vegetable products (-1.5%). The RMPI excluding mineral fuels rose 1.2% from the previous month.

The RMPI increased 10.0% over the February 1992 level, mainly because of higher prices for wood (24.9%), mineral fuels (12.0%) and animal and animal products (4.8%). The RMPI excluding mineral fuels was up 9.2% over the past year.

The mineral fuels index was up in February by 4.6% as a result of higher prices for crude mineral oil (4.9%). After six months of increase, the coal index registered a drop of 1.8%. The mineral fuels index was higher by 12.0% from February 1992, due primarily to a 12.8% increase in the index of crude mineral oil.

The wood index rose 4.6% in February, due primarily to a 6.2% increase in prices for logs and bolts. This is the thirteenth consecutive increase. On a year-to-year basis, the wood index increased 24.9%, owing mainly to a 34.0% increase in the logs and bolts index. In contrast, the pulpwood index registered a 3.0% increase from its February 1992 level.

The animal and animal products index posted a 0.7% increase over the past month. The major contributors to this increase were indexes for furs, hides and skins (14.1%) and hogs for staughter (2.3%). Over the past year, the animal and animal products index increased 4.8% as a result of higher prices for cattle for slaughter (16.3%) and hogs for slaughter (8.2%).

The non-ferrous metals index was down 1.5% in February, mainly due to lower prices for copper concentrates (-1.7%), aluminum materials (-2.2%) and radio-active concentrates (-4.4%). Increases were registered in indexes for nickel concentrates (3.5%) and lead concentrates (1.6%). Compared to February 1992, the non-ferrous metals index was up 2.3% owing primarily to higher prices for radio-active concentrates (25.2%), copper concentrates (2.4%) and aluminum materials (7.2%).

The vegetable products index posted a decrease of 1.5%, mainly due to lower prices for wheat (-5.8%), corn (-2.8%) and cocoa, coffee and tea (-5.8%). These declines were partially offset by the 5.3% increase in the index for raw tobacco. The vegetable products index was up 5.3% from its February 1992 level, primarily as a result of higher prices for rapeseed (26.2%), raw tobacco (18.4%) and unrefined sugar (18.3%). In contrast to this, the wheat index registered a 11.5% drop in its prices from a year earlier.

#### Faits saillants

#### Indice des prix des matières brutes

Les chiffres préliminaires du mois de février 1993 indiquent que l'indice des prix des matières brutes (IPMB, 1986 = 100) a augmenté de 2.1% par rapport au niveau de janvier (108.3). Cinq des sept composantes faisant partie de l'IPMB ont enregistré des hausses. Des prix plus élevés ont été rapportés pour les indices des combustibles minéraux (4.6%), du bois (4.6%) et des animaux et des substances animales (0.7%). Ces hausses ont été partiellement contrebalancées par les baisses dans les indices des métaux non ferreux (-1.5%) et des substances végétales (-1.5%). L'IPMB sans la composante des combustibles minéraux a affiché une hausse de 1.2% au cours du dernier mois

Par rapport au mois de février 1992, l'IPMB a progressé de 10.0%, principalement en raison des augmentations des prix du bois (24.9%), des combustibles minéraux (12.0%) et des animaux et substances animales (4.8%). L'IPMB sans la composante des combustibles minéraux a augmenté de 9.2% entre février 1992 et février 1993.

L'indice des combustibles minéraux a augmenté de 4.6% en février, suite à la hausse de 4.9% des prix des huiles minérales brutes. Cependant, l'indice du charbon a affiché une baisse de 1.8%, faisant suite à six mois consécutifs d'augmentations. L'indice des combustibles minéraux a augmenté de 12.0% comparativement à l'an dernier, en raison de la hausse des prix des huiles minérales brutes (12.8%).

L'indice du bois a progressé de 4.6% en février, en raison de l'augmentation de 6.2% enregistrée dans les prix des billes et billots. Cette augmentation est la treizième en autant de mois. Par rapport à février 1992, l'indice du bois a augmenté de 24.9%, en raison de prix plus élevés pour les billes et billots (34.0%). L'indice du bois à pâte a, pour sa part, enregistré une augmentation de 3.0% comparativement à l'an dernier.

L'indice des animaux et substances animales a enregistré une hausse de 0.7% ce mois-ci. Les principaux indices qui en sont responsables sont ceux des fourrures, cuir et peaux (14.1%) et des porcs destinés à l'abattage (2.3%). Au cours de la dernière année, l'indice des animaux et substances animales a augmenté de 4.8%, en raison des hausses dans les indices des prix des bovins envoyés à l'abattage (16.3%) et des porcs destinés à l'abattage (8.2%).

L'indice des métaux non ferreux a enregistré une baisse de 1.5% en février suite à des diminutions dans les prix des concentrés de cuivre (-1.7%), des matériaux d'aluminium (-2.2%) et des concentrés radio-actifs (-4.4%). D'autre part, des augmentations ont été enregistrées dans les indices des concentrés de nickel (3.5%) et des concentrés de plomb (1.6%). Au cours des douze derniers mois, les prix des métaux non ferreux ont augmenté de 2.3%, principalement à cause des hausses dans les prix des concentrés radio-actifs (25.2%), des concentrés de cuivre (2.4%) et des matériaux d'aluminium (7.2%).

Quant à l'indice des substances végétales, il s'est inscrit à la baisse en février (-1.5%), à cause des diminutions dans les indices du blé non moulu (-5.8%), du mais non moulu (-2.8%) et du cacao, café et thé (-5.8%). Ces baisses ont été partiellement contrebalancées par la hausse de 5.3% dans l'indice du tabac en feuilles. Par rapport à l'an dernier, l'indice des substances végétales a augmenté de 5.3%, en raison des prix plus élevés dans les indices du colza (26.2%), du tabac en feuilles (18.4%) et du sucre non raffiné (18.3%). Cependant, l'indice du blé non moulu a enregistré une diminution de 11.5% dans ses prix comparativement à l'année précédente.

Indexes for the most recent six months shown are subject to revision Note: Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

This shows the amount by which the movement of each index would move the total in the absence of any change in the other indexes. Ce chiffre donne l'ampieur de la variation qu'occasionnerait dans l'indice d'ensemble un mouvement d'un indice donné si tous les autres indices demeuraient (1) (1) inchangés.

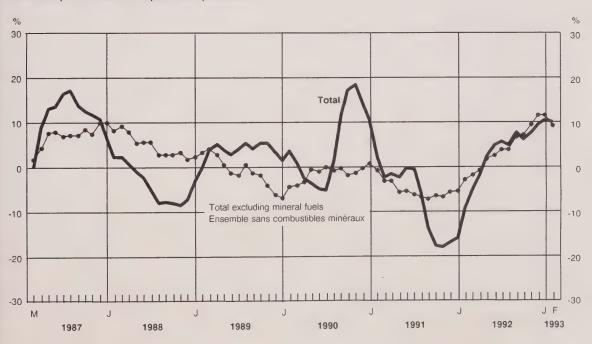

These indexes are preliminary. Ces indices sont provisoires.

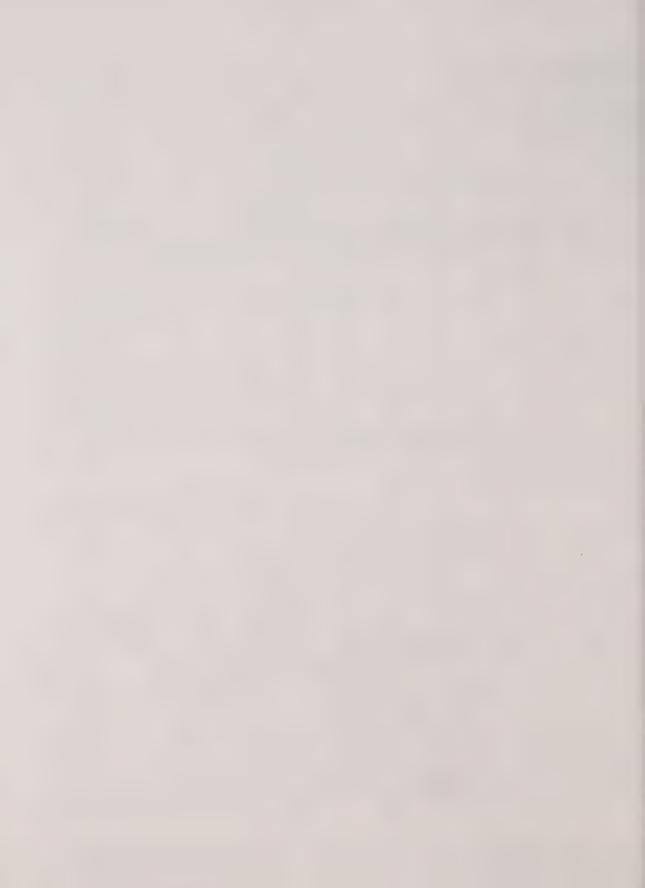

# Raw Materials Price Index Indice des prix des matières brutes

# Percentage Change in the Raw Materials Price Index Variation en pourcentage de l'indice des prix des matières brutes

From same month of previous year Variation depuis le même mois que l'année précédente

<sup>(1)</sup> (1) (2) (2) (3)

These indexes are preliminary.
Ces indices sont provisoires.
Revised.
Révisé.
The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux différent occasionnellement en raison de l'arrondissement, l'Indice total – Tous les produits devra être considéré comme celui qui fait autorité, et l'Indice total – Toutes les industries manufacturières sera posé égal. (3)

#### TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations

#### TABLEAU 2. Indices des prix des produits industriels, par produits et agrégations de produits

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where ss indicates the S-level commodity code (from 14 to 43, 45 to 69) nn indicates either a split of the M-level commodity, or 91, which indicates are possible portradation.

nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates a special aggregation or 99, which indicates special details. ppp indicates the PCG code (except for some special aggregations which include several PCGs). rr indicates a split of a PCG.

The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E+S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(Catalogue 62:556)
En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-popp-rr où sindique le code du niveau S des produits (de 9 à 28) mm indique le code du niveau M des produits (de 14 à 43, 45 à 69) nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers. pppp indique le code GPP (sauf pour certains agregats spéciaux qui comprennent plusieurs GPP) ri indique une composante d'un GPP.

La mesure du depré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole. E indique un échantillonnage exhaustif. S indique un

ri moque une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E+S). Ces mesures du degré de couverture sont parlois arrondies au 5% le pius prés afin d'assurer la confidentialité. In mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A. les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 190, concepts et méthodes (n<sup>0</sup> 62:556 au catalogue).

### TABLEAU 3. Indices des prix des produits industriels, par industries et groupes d'industries(1)

1986 = 100
